Plus many more

How our **Hosted UC** service works

Our Hosted UC is a complete, fully featured and flexible cloud voice solution for your business, providing the highest voice clarity on every call, everywhere. Using the power of the cloud, means organisations need less on-site hardware than with other phone systems, plus maintenance is fully taken care of, resulting in less strain on your IT team. Phone extensions can be either physical handsets, or Softphone client on a staff members PC or Mobile. Extensions aren't bound to one physical location, with the ability to work across offices, or even from home.

Redefining the way Business Telco in Australia should be.

We are Australia's most trusted telecommunications partner for businesses that demand reliability above everything else.
