

Connectivity

Dark Fibre

Connectivity Dark Fibre

Key Features and Benefits

The ultimate in flexibility and performance for wholesale and enterprise customers, limited only by the equipment connected at each end.

- ✔ **Ultimate Speeds**
Up to 10Gbps and beyond.
- ✔ **Flexible Solutions**
Single core to high count fibre solutions.
- ✔ **Flexible Costs**
Monthly recurring costs or long-term Indefeasible Right to Use (IRU).
- ✔ **Unique Options**
Your choice of routes and reach – NBN POIs, Microwave Towers and Data Centres.
- ✔ **Dedicated Options**
Your very own dedicated point to point strand of fibre.
- ✔ **Cost effective and flexible**
You choose the transmission equipment and upgrade as your requirements change.

How Dark Fibre works

Dark Fibre is an unlit pair of fibres in a Point-to-Point configuration between two locations. While Dark Fibre requires the customer to deploy and manage their own equipment to light the fibre, the advantage gained is full control and scale with near limitless capacity.

Redefining the way Business Telco in Australia should be.

We are Australia's most trusted telecommunications partner for businesses that demand reliability above everything else.
