Managed Firewall

Key Features and Benefits

Detect and protect your private network from unwanted internet traffic and intrusion attempts with ONQs Managed Firewall service.

☑ **Gain Insight**
Real time insight and visibility into your network. Understand your traffic and network performance instantly.

☑ **Robust**
Hosted on dedicated infrastructure in our Data Centres. We fully manage your Firewall instance, ensuing everything is always up-to-date and patched.

☑ **Priority Support**
Expert priority support from a helpdesk dedicated to business – 24/7/365.
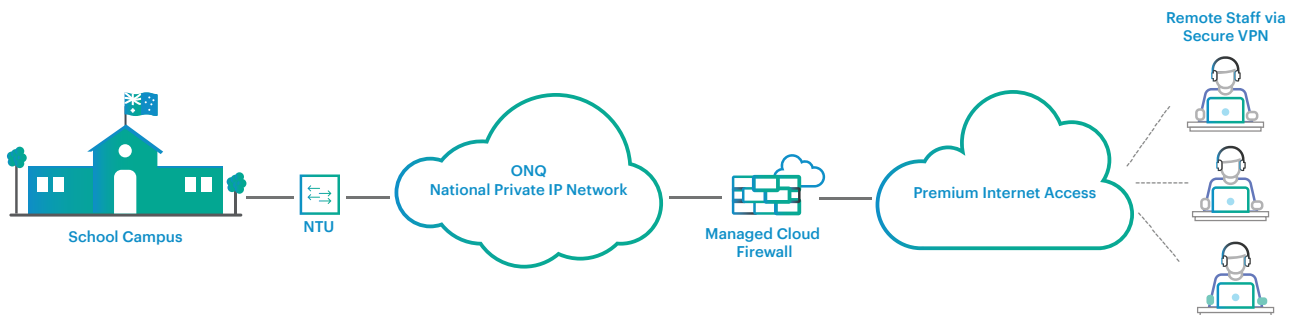

☑ **Cost Effective**
Eliminate capital investments, with an affordable monthly OPEX cost. Any service changes or modifications are inclusive.

☑ **Managed Remote Access**
Enable seamless and secure remote access for staff and partners with SSL and IPSec VPN options.

### How does a Managed Firewall solution work for a **single site**

Our Managed Firewall for a single site is hosted within the ONQ Core, increasing reliability and ease of updates, by removing the onsite hardware appliance requirement.

School Campus — NTU — ONQ National Private IP Network — Managed Cloud Firewall — Premium Internet Access — Remote Staff via Secure VPN

How does a Managed Firewall solution integrate with a Private IP WAN

Our Managed Firewall for multiple sites is deployed in the ONQ Core, at the virtual edge of your Private IP Network. Such a topology ensures a single ingress/egress location between the Internet and internal network, with the added benefit of removing the requirement for multiple hardware appliances on site. Other services, such as Cloud Connect, can also be added to the mix, enabling granular Layer 3 control of traffic.

Head Office

Private IP via ONQ Fibre

4G/LTE (Automatic Failover)

Warehouse

Private IP via ONQ Wireless

Regional Office

Private IP via NBN EE

ONQ National Private IP Network

Managed Cloud Firewall

Remote Staff via Secure VPN

Premium Internet Access

Redefining the way **Business Telco** in Australia should be.

We are Australia's most trusted telecommunications partner for businesses that demand reliability above everything else.
